

AJ- CHEMICAL 332 Enhanced Fuel Oil Conditioner

TREAT NOW is formulated with specific chemical components to be extra effective in maintaining the long term quality and stability of heating oils.

TREAT NOW is a *super-concentrated* composition of oil enhancers, stabilizers, anti-oxidants, surfactants, penetrants, combustion improvers, and inhibitors – developed to provide these critical functions:

- ◆ Maintaining product stability, uniformity, and homogeneity
- ◆ Preserving fuel viscosity, fuel integrity, and other fuel specifications necessary for ideal fuel combustion, and thereby minimizing soot and carbon buildup
- ◆ Dissolving existing sludge gradually, and immediately stopping further buildup
- ◆ Purging strainers, filters, and lines free of asphalts, gums, and tars
- ◆ Removing water and controlling condensation formation
- ◆ Inhibiting corrosion of tanks and lines and deactivating adverse reactions
- ◆ Creating an environment hostile to biological growth
