

## AJ-CHEMICAL 340

### **Diesel Cold Flow Improver and Conditioner**

**CFI-MC** represents an industry-recognized, proven method for ensuring a free-flowing diesel fuel at even the coldest sub-zero temperatures. Its unique composition provides a full range of critical benefits for efficient all-season diesel operation.

**CFI-MC** is a concentrated composition of proven, highly active cold flow improvers and engine performance enhancers that work together to effectively provide these critical functions:

- ◆ Preventing filter gelling during sub-freezing ambient temperatures
- ◆ Lowering both the Cold Filter Plugging Point and Pour Point
- ◆ Improving cetane number for faster warmups and better ignition quality
- ◆ Removing water crystals and deicing product
- ◆ Cleaning and lubricating pumps and injectors, optimizing their performance
- ◆ Providing cold weather protection more effective and economical than kerosene
