

AJ CHEMICAL 343

Heavy Oil Conditioner and Performance Enhancer

INDUSTRIAL 46 represents a unique breakthrough in chemical treatment of all heavy oils including high-vanadium Bunker C, and conventional #4 - #5 - #6 oils, and refinery blended #4 oils.

INDUSTRIAL 46 is a super-concentrated composition of proven, highly active oil enhancers that work together to effectively provide these critical functions:

- ◆ Maintaining product stability and uniformity
- ◆ Ensuring homogeneity of #4 oils produced via terminal blending of #2 and #6 fuels
- ◆ Dissolving existing sludge gradually while acting to stop further buildup
- ◆ Preventing formation of highly corrosive vanadium oxide slag on firetube walls
- ◆ Improving combustion efficiency by destroying soot particles and preventing heavy carbon deposits
- ◆ Minimizing environmental concerns by eliminating hydrocarbon and acidic stack emissions
